Router

Internal Antennas

External Antenna

Power Cord

Installing Your Wi-Fi Router

For Internal Antenna Installation:
Step 1: Find a suitable location with an area of 520mm x 200mm to install the Router with the four Black Antennas.
Step 2: Fix the Router securely in the center of that location.
Step 3: Screw in the four Black Antennas into the ports on the router with the same label as on the antennas and the router.
Step 4: Connect the 12Volt Power Cord to a 12Volt source and plug into the Router.

For External Antenna Installation:
Step 1: Find a suitable location with an area of 200mm x 380mm to install the Router with three Antenna Plugs and one Black Antenna.
Step 2: Fix the Router securely in the center of that location.
Step 3: Mount the External Antenna on the roof of the van in the preferred location and run the wiring to the Router's location.
Step 4: Screw in the three wire plugs to the same labeled ports on the router and the remainder port with one Black Antenna.
Now you are ready to set up your WiFi Router.

Preferred Antenna Placement

Wi-Fi Router Set Up

Step 1: Make sure the power plug is **NOT** plugged into the Wi-Fi Router. Fig 1

Step 2: Insert your full sized SIM Card into the SIM Slot on the side of your Wi-Fi Router. Fig 2

Step 3: Now plug in the power plug into the side of the Wi-Fi Router. Fig 3

Step 4: On your smart device, open the WiFi settings and locate the device "WIFI-59F634" Fig 4. (this is a unique number for every unit which will be different) and click on it. You now should be connected to WiFi. Fig 5

Step 5: On your smart device open any web browser and in the web address bar type in 192.168.1.1 and click Go. Fig 6. Welcome Page, Now click in the white bar and type in "admin" and click LOGIN. Fig 7

Step 6: In the top left hand corner, click on the menu bars Fig 8, and click WiFi Set Up. Fig 9
To change your WiFi name, click on the "WIFI-59F634" Fig 10, and backspace on these digits and type in your own personal WiFi name e.g.: MYWIFI. Fig 11, Now click on the WPA PSK: (no encryption) arrow Fig 12, and click on (encryption) **Note:** make sure you backspace on any previous digits and type in your own personal password e.g.: ABCD1234 Fig 13, and then click on save. In the top right hand corner click on the body symbol and click on Logout Fig 14, and then you may close the web browser.

Step 7: Now go back into your smart device settings, locate your personal WiFi name "MYWIFI" and click on it. Now type in your new password "ABCD1234" and click connect.

CONGRATULATIONS

You are now connected to your new personalized WiFi Network. Fig 15
